

1. Several API Testing Updated

- i. Testing to filter university
- ii. Testing to create reservations with period
- iii. Testing to manage status
- iv. Testing to manage notifications

2. Reservation details and property modifications

- i. Provide period in reservations. Members and Specialist can input the reservation period when reserving accommodations. Specialist can edit the reservation period.
- ii. Provide constraint in reservations. If the reservation is confirmed to be reserved by other members, the period of that accommodation should not be available for reservation for other members
- iii. Provide new status displayed in reservations. Originally, reservation details included “Pending”, “Confirmed”, “Cancelled”. New Status “Completed” has been added to show that the accommodation rental contract has finished.
- iv. After the reservation status is “Confirmed”, member cannot cancel the reservation as the accommodation is confirmed to be reserved.

3. Rating system property modification

- i. The rating function is now available only after the reservation status is “completed”. Members who have not finished the contract period cannot give a rating to the accommodation.

4. Accommodation Display modification

- i. After selecting the campus, the accommodation is now shown in ascending order with reference to the distance to the selected campus. Originally, it would only show a sorted list after both campus and target distance are specified.
